

Editorial

Since the foundation of the company in 1959, Sudlac is very concerned by developing products that are safe to the environment. When the solvent paints left no room for other choice, Sudlac took the challenge to formulate water based paints. Now engaged in the coatings care program, the company follows its philosophy of producing biodegradable product in each market: Horticulture, Landscaping, and Building.

Coming soon: This year Sudlac will organize a special 'apero-bar', outside of the HortiFair which is being held from 12-15 October 2010. In September we keep you posted about the private invitation

MPS-code list of Sudlac's Horticulture range

MPS
Sustainable Quality

The Eco-label MPS* ABC is an official environment certificate specifically meant for horticulture : floriculture, bulb, arboriculture, vegetable and fruit sectors. More and more producers grow sustainably and join the Dutch initiative to obtain a MPS certificate.

Sudlac shading paints and cleaners have the MPS-code green or white. These products can be used in the MPS-ABC label.

*MPS : Environmental Program for Horticulture - 'Milieu Progamma Sierteelt' in Dutch. MPS represented 4000 members and 24 300 ha of culture in 2009.

New Label for Serra Ligne

The label of Serra Ligne has been refreshed. Well known visual elements have been design in 3D. Logos of biodegradability and Non phytotoxicity have been added.

The new label is now more clear and modern, still giving the feeling of professional security.

The product retains its usual packaging: plastic jerrycan of 15 Kg, 40 units per pallet.

Other new labels of the landscaping range will follow soon.

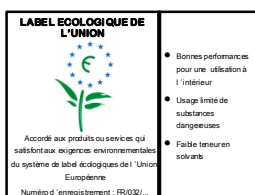

Surfa®Nature for interior ceiling

This natural paint is being registered by the European Ecolabel.

Surfa Nature is of neutral odor, high whiteness and has stability of color. Ready to use and quickly drying, Surfa Nature saves time. It is a high quality paint that looks like a gel and does not run.

Its high opacity conceals small surface defects in a perfect tense.

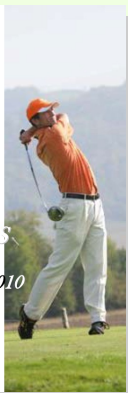

- Bonnes performances pour une utilisation à l'intérieur
- Usage limité de substances dangereuses
- Faible teneur en solvants

Sudlac : The 'green' team!

1^{er} Challenge

ENTREPRISE

Dimanche 13 juin 2010

Strongly represented in this event, Sudlac will participate to the 1st Golf Enterprise Challenge that will be held on June 13th .

Open to novices and assisted by their team captain, this challenge aims to make known and democratize golf. We hope that a regular weekly training for two months will lead to success!
