

DropStop®

STOP CONDENSATION

EFFICIENT FOR PLASTIC AND GLASS GREENHOUSES

The condensation on the inside surfaces of the greenhouse poses an obstacle for the light to penetrate into the greenhouse. The condensation droplets on the surface have undesirable effect on the crop: a barrier for the sun light to enter the greenhouse and an irregular diffusion of the sun light inside the greenhouse, including the "magnifying glass effect"... The dripping of the water causes bacterial infections and fungi and an uncomfortable work situation in the greenhouse. Through its hydrophilic action, **DropStop** creates a thin, homogeneous and translucent layer.

- **DropStop** is applied on the inside of the greenhouse. It is not aggressive for the structure, nor for the environment inside the greenhouse (under normal conditions).
- It is available as a highly concentrated, transparent liquid gel.
- **DropStop** is packed in jerry cans of 2 and 5 litres, made of recyclable PEHD.

- Mix the solution well.
 - Apply with spraying equipment with a fine nozzle.
 - Apply on a dry surface, in a way that the product has the time to dry.
 - The layer is effective about 1 hour after its application (according to hygrometry).
 - Resists a whole season.
- **YIELD:** 1 litre of product diluted in about 40 to 70 litres of water is sufficient for about 400 to 700 m².
 - **STORAGE:** Store the product in its original package at temperate conditions. **DropStop** can be defrosted after being frozen. Back in its unfrozen state the properties of the product haven't changed because of the freezing.
 - **DropStop** is a chemical product for professional use. The use of gloves and safety glasses is recommended. The product does not need safety labelling. Keep out of reach of children.

FOR PROFESSIONAL USE ONLY IMPORTANT NOTE: The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and current laws. The given data is based on average observed results. Our suggestions do not relieve the user of the necessity to test our products and to verify for the suitability for the purpose envisaged according to the used conditions. Any person using the product for any purpose other than that specifically recommended in the technical data sheet does so at his own risk. Always read the safety data sheet and the technical data sheet for this product. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, we do not accept any liability whatsoever for any loss damage arising out of the use of the product. All products supplied and technical advices given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
