

Eclipse[®] F4

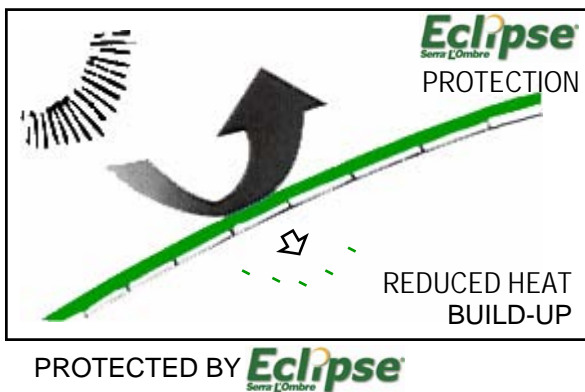

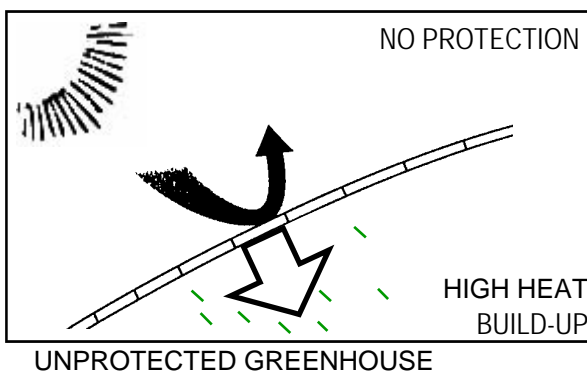

Serra L'Ombre

PURPOSE

Eclipse[®] is used to tint glass and plastic greenhouses for a season. It will regulate light intensity and humidity conditions for the perfect climate inside your greenhouse

Net Weight 20 Kg

MAIN PROPERTIES

- Sharp reduction in temperature in premises protected by **Eclipse[®]**
- Barrier against hot, short wavelength infrared rays.
- Opaque in dry weather, transparent when wet.
- Easy to use, diluted with water.
- Easy to remove in autumn with **Eclipse[®] Net**

SPECIAL FEATURES OF **Eclipse[®] F4**

- Biodegradable, with neutral odour, and safe for the users during application.
- Very good adherence for longer-lasting results on glass and plastic.
- Greater concentration and rain resistance.

USE

Dilution :

1 vol. **Eclipse[®] F4**
+ 3 à 5 volumes of water

Application : By spray gun or roller on dry, grease-free glass or plastic.

Number of coats : One at the beginning of spring + one before the hot season if required, depending on the crop

Yield : 1 kg covers 35 to 45 m²

Removal: In autumn using water + **Eclipse[®] Net**
